Summary

I am a junior full-stack web developer with aspirations towards design and UI/UX. I have a strong background in computer-based music production and hold creative problem solving as one of my highest aptitudes.

Experience

Full Stack Engineer
TEK BLOG

2022 - 2022 (1 year)

• Utilized Express, Node, MySQL, and Handlebars.js for a full-stack web blog.
• Integrated a RESTful API architecture for a responsive webpage that's set up for scalability.
• Deployed application to host service Heroku with a MySQL database.

Frontend Developer
PIG-E BANK

2022 - 2022 (1 year)

• Website design and build from wireframe to MVP.
• Used Handlebars.js and Bootstrap for front-end design.
• Worked closely with backend team integrating GitHub for collaboration.

Front End Lead
Karmatic

Led front-end team and created mock-ups.
• Executed code to MVP based on mock-ups using React and Styled-Components
• Communicated with back-end to efficiently write code for production.

Education

UT Austin Boot Camps
Full-Stack Web Development, Computer Science

2022 - 2022

Explored and implemented code in various formats and languages. Learned the MERN stack for creating a website from scratch, back to front.

Berklee College of Music

The Woodlands High School

Skills

HTML5 • Cascading Style Sheets (CSS) • JavaScript • React.js • styled-components • Node.js • MongoDB • GraphQL • Apollo GraphQL • Bootstrap
